☐ Class 11 Mathematics – Chapter: Introduction to Three Dimensional Geometry

1. Introduction

Three Dimensional Geometry studies points, lines, and planes in 3D space.

Coordinates are represented as (x,y,z)(x, y, z)(x,y,z) in a 3D coordinate system.

2. Coordinate Axes

Three mutually perpendicular axes: X-axis, Y-axis, Z-axis.

- Origin O=(0,0,0)O = (0, 0, 0)O=(0,0,0).
- Each axis has positive and negative directions.

3. Coordinates of a Point

- Any point PPP in space is denoted by (x,y,z)(x, y, z)(x,y,z).
- xxx, yyy, and zzz represent the distances from the YZ-plane, XZ-plane, and XY-plane respectively.

4. Distance Between Two Points

For points P(x1,y1,z1)P(x_1, y_1, z_1)P(x1,y1,z1) and Q(x2,y2,z2)Q(x_2, y_2, z_2)Q(x2,y2,z2),

 $PQ = (x2-x1)2 + (y2-y1)2 + (z2-z1)2PQ = \sqrt{(x_2-x_1)^2 + (y_2-y_1)^2 + (z_2-z_1)^2} PQ = (x2-x1)2 + (y2-y1)2 + (z2-z1)2 + (z2-z1)2$

5. Section Formula in 3D

Point RRR dividing segment PQPQPQ in ratio m:nm:nm:n,

 $R = (mx2 + nx1m + n, my2 + ny1m + n, mz2 + nz1m + n)R = \left(\frac{m x_2 + n x_1}{m + n}, \frac{m + n},$

6. Midpoint Formula

Midpoint of PQPQPQ is

 $M = (x_1 + x_2, y_1 + y_2, z_1 + z_2) M = \left(\frac{x_1 + x_2}{2}, \frac{y_1 + y_2}{2}, \frac{z_1 + z_2}{2} \right) M = (x_1 + x_2, y_1 + y_2, z_1 + z_2) M = (x_1 + x_2, y_1 + y_2, z_1 + z_2) M = (x_1 + x_2, y_1 + y_2, z_1 + z_2) M = (x_1 + x_2, y_1 + y_2, z_1 + z_2) M = (x_1 + x_2, y_1 + y_2, z_1 + z_2) M = (x_1 + x_2, y_1 + y_2, z_1 + z_2) M = (x_1 + x_2, y_1 + y_2, z_1 + z_2) M = (x_1 + x_2, y_1 + y_2, z_1 + z_2) M = (x_1 + x_2, y_1 + y_2, z_1 + z_2) M = (x_1 + x_2, y_1 + y_2, z_1 + z_2) M = (x_1 + x_2, y_1 + y_2, z_1 + z_2) M = (x_1 + x_2, y_1 + y_2, z_1 + z_2) M = (x_1 + x_2, z_2) M$

7. Coordinate Planes

•

XY-plane: z=0z = 0z=0

•

YZ-plane: x=0x = 0x=0

•

XZ-plane: y=0y = 0y=0

8. Applications

Used in physics, engineering, computer graphics.

Helps in visualization of real-world objects.

9. Exam Tips

- Practice plotting points in 3D.
- Memorize distance and section formulas.
- Understand concept of axes and planes clearly.
